Change Over Time

In the Fall of 2018, I was accepted into a 6-month program, traveling to 6 countries and working for 6 different agencies, one month at a time. As a way to synthesize my experience, I collected data from my daily experiences and explored ways to display it in real time.

In addition to this daily log, I wrote a reflection at the end of each month as a summary of my experiences. Finally, I photographed everything I packed in my suitcase and generated a screensaver that “unpacks” onto the screen if the mouse remains inactive.
